

Panoramic Coaches trains

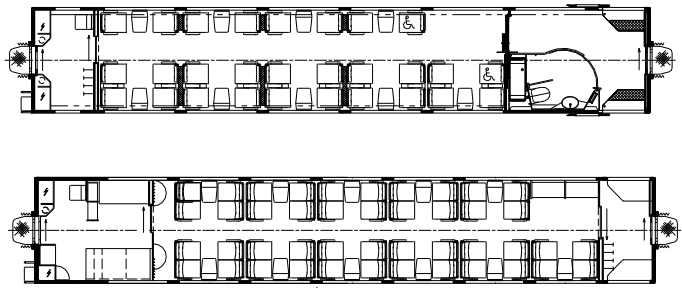

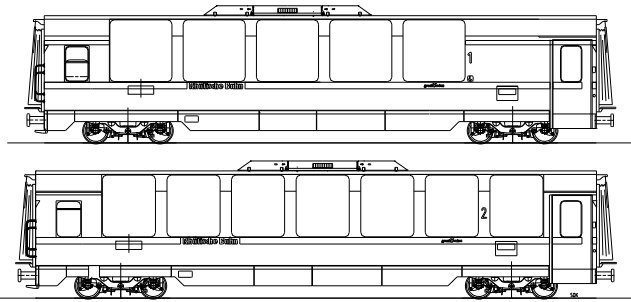

for the “Bernina Express” Rhätischen Bahn (RhB), Switzerland

The Rhätische Bahn purchases once again a total of 16 of these comfortable panoramic coaches (6 First Class coaches equipped for wheelchair access, 6 Second Class coaches and 4 Second Class/Service coaches) for service on the entire RhB lines network, but particularly on the Bernina Line. A unique feature is the large panoramic windows which allow an unhindered view of the idyllic Alpine scenery. The advanced construction methods using aluminium extrusions enables weight and cost optimisation for the carbody design well in line with the existing vehicle concepts. One significant innovation in these further developed coaches are the pneumatic spring fitted Stadler bogies which ensure a quiet and comfortable ride.
