

ENVIRONMENTAL POLICY

STADLER RAIL VALENCIA S.A.U. is dedicated to the design, manufacture, refurbishment and maintenance of railway vehicles and bogies and is highly committed to complying with standards and good practices in every area of its business to ensure **environmental protection**.

The Chairman's Office leads the current Environmental Management System, certified according to the UNE-EN-ISO 14001:2015 standard.

The main responsibilities acquired under this mandate include the dissemination of its **environmental culture** among all stakeholders. It also allocates the resources necessary for the following milestones:

> Compliance with all **legal requirements** related to the identification and evaluation of its environmental engagements and processes and with the voluntary requirements Stadler Rail Valencia S.A.U. chooses to assume.

> Launch of **environmental objectives and targets**, addressing new challenges and encouraging participation by all the company's workers.

> Implementation of actions for **pollution prevention**, highlighting those which:

- reduce hazardous waste;
- increase product recyclability;
- reduce the company's carbon footprint;
- increase energy efficiency.

> Deployment of programmes to promote the **continuous improvement** of the Environmental Management System and develop projects that improve the **environmental performance** of its products.

> Provision of the **training and information** necessary to ensure that all the company's workers have the competencies and skills required for their **environmental responsibilities and functions**.

Stadler Rail Valencia S.A.U. maintains that its business must evolve hand in hand with the environment, which is why it is committed to sustainable development and makes public its declaration of intent by means of this policy.

Albuixech, 3 May 2021

Signed: Íñigo Parra Campos,
Chairman of Stadler Rail Valencia, S.A.U.
